

# FX DRY PIPE VALVE

*New Reliable Valve. Same Reliable Quality.*

Delivering on our goal to get you on and off the job site fast, Reliable now offers its FX Dry Pipe Valve. The Model FX is a compact, lightweight, externally-resettable differential type dry valve that is simple to specify, install, and maintain.

## Save time and money with the new FX

- Lightweight, fully trimmed with optional control valve and accelerator saves installation time
- External reset reduces setup time, and protective housing prevents accidental resets when draining the system
- Compact footprint saves valuable riser room space
- Assembled and rigorously tested in Liberty, SC

Nominal Valve Size	End Connections	Pressure Rating psi (bar)	Listings and Approvals
2" (50mm)	Gr x Gr	250 (17.2)	cULus, FM
